

low swb because of evil capitalism

- see also Lane “The Loss of Happiness in Market Democracies”
- we started global capitalism with WB, IMF, WTO because of the WW2 to rebuild the devastated world
- capitalism is great at producing things, but we don't need it anymore, if anything we need to degrow GDP (??)
- and main reason is climate change (?)
- but also we don't need any more stuff for happiness (?)
- capitalism does mind boggling things eg China consumed 6,500 million tons of cement between 2011 and 2014—in one hundred years the United States has consumed only 4,500 million tons (?)
