outline

why study happiness ?

common and ancient wisdom (related to the five theories)

history and philosophy

can we study it scientifically?

five major theories [just quick, properly next week!]

the classics, the pioneers [subjective]

today

- we'll properly motivate "why happiness?"
- review some of the common and ancient wisdom
- have a snapshot of history and philosophy
- "prove" it is science: validity, reliability
- and start with the 5 theories, which we will dig deep into next week
- and only then, in few wks, get to pub pol/adm and community stuff

outline

why study happiness ?

common and ancient wisdom (related to the five theories)

history and philosophy

can we study it scientifically?

five major theories [just quick, properly next week!]

the classics, the pioneers [subjective]

why?

- end in itself!
- "a prince who will not undergo the difficulty of understanding must undergo the danger of trusting"
- [everything, eg happiness experts, car mechanics, physicians]
-
- a number of fascinating research questions to answer
eg: can money buy happiness?

outline

why study happiness ?

common and ancient wisdom (related to the five theories)

history and philosophy

can we study it scientifically?

five major theories [just quick, properly next week!]

the classics, the pioneers [subjective]

money (spend like 40min discussing)

- Life is a progress from want to want, not from enjoyment to enjoyment. Samuel Johnson, 1776 [treadmill]
- People who claim that money can't buy happiness just don't know where to shop. Anonymous [livability v consumerism]
- A wealthy man is one who earns \$ 10,000 a year more than his wife's sister's husband. H.L. Mencken [comparisons]
- If thou wilt make a man happy, add not unto his riches but take away from his desires. Epicurus
[aspirations/expectations; Carver/swb as motivator; human as center of universe/Jung/look inside, not outside]

outline

why study happiness ?

common and ancient wisdom (related to the five theories)

history and philosophy

can we study it scientifically?

five major theories [just quick, properly next week!]

the classics, the pioneers [subjective]

history: McMahon D "Happiness: A history"

- From beginnings we were interested in happiness:
- essentially two ideas, "good life" v "happy life/pleasure"
- kind of like Apollo v Dionysus:
- Apollo: rational thinking and order, and appeals to logic, prudence and purity.
- Dionysus, the god of wine and dance: irrationality and chaos, and appeals to emotions and instincts.
- but more precisely:
- Aristotelian Eudaimonia (good life, living well)
- Benthamite Greatest Happiness for the Greatest Number

Aristotelian Eudaimonia

- Eudaimonia=good life: virtue, good spirit
- Eudaimonia (happiness) = active, complete life inclusive of all that has intrinsic value
- perfection in respect of virtue; resources sufficient for a living creature
- <https://positivepsychologyprogram.com/eudaimonia/>
- <https://en.wikipedia.org/wiki/Eudaimonia>

Benthamite Greatest SWB for the Greatest Num

- more pleasure than pain for as many as possible
- hedonic calculus: seek pleasure, avoid pain:
 - $\text{happiness} = \text{pleasure} - \text{pain}$
- have political and legal reforms to produce
 - Greatest Happiness for the Greatest Number
- this is what we're witnessing today!
 - early political advocates: [Stiglitz et al. \(2009\)](#), now even Sachs!
 - UK, New Zealand, UAE/Dubai, OECD, Bhutan, etc

Epicurus

- all pleasure is good! (Annas, 1987)
- but not unnecessary desires (consumerism!), rather simple and frugal life; desire only the very basics, otherwise setting up yourself for hedonic treadmill (Weijers, 2011)
- overindulgence often leads to pain
- achieve inner tranquility
- <http://www.pursuit-of-happiness.org/history-of-happiness/epicurus/>
- (Brooks, 2021)
- be frugal and social, ie like a commune/hippie! (School of Life-Epicurus) https://youtu.be/Kg_47J6sy3A (fun; and others by school of life)

Dionysus aka Bacchus

- god of the grape-harvest, wine making and wine, of fertility, ritual madness, religious ecstasy and theater
- <https://en.wikipedia.org/wiki/Dionysus>
- on hedonism, pleasure,
- eg see doctoral thesis by Dan Weijers: <http://researcharchive.vuw.ac.nz/bitstream/handle/10063/2370/thesis.pdf?sequence=2>

- "It is better to be a human being dissatisfied than a pig satisfied; better to be Socrates dissatisfied than a fool satisfied." (Mill, 2010) ""A being of higher faculties requires more to make him happy, is capable probably of more acute suffering"

[https://open.library.okstate.edu/introphilosophy/chapter/pigs-or-socrates/#:~:](https://open.library.okstate.edu/introphilosophy/chapter/pigs-or-socrates/#:~:text=It%20is%20better%20to%20be,own%20side%20of%20the%20question.)

[text=It%20is%20better%20to%20be,own%20side%20of%20the%20question.](https://open.library.okstate.edu/introphilosophy/chapter/pigs-or-socrates/#:~:text=It%20is%20better%20to%20be,own%20side%20of%20the%20question.)

- Wong (2018) grad sch— > bad menHea

and the winner is...

- which one do you like? Bentham or Aristotle?
(a fascinating philosophical debate ([Nussbaum, 2005](#)))

outline

why study happiness ?

common and ancient wisdom (related to the five theories)

history and philosophy

can we study it scientifically?

five major theories [just quick, properly next week!]

the classics, the pioneers [subjective]

“but it is in the clouds!”

- “happiness is something different for everyone”
- “one moment i am happy, another moment i am unhappy”
- “it doesn’t really matter; it’s just a silly fleeting emotion”
- nope! it’s solid science!

definition

- self-reported
- subjective
- life satisfaction \approx utility
- $\max(\text{life satisfaction}) \approx$ utilitarianism
- life satisfaction \neq happiness
cognition \neq affect
- here, use interchangeably but remember distinction
- SWB (subjective wellbeing) is another popular term

measurement

- wvs question: “all things considered, how satisfied are you with your life as a whole these days?” (1 to 10)
- gss question: “taken all together, how would you say things are these days - would you say that you are very happy, pretty happy, or not too happy?” (1-3) [some criticism, i guess wording in wvs little better 'sat w life' as opposed to 'happy', just 3steps]
- a see swsl sc

http://labs.psychology.illinois.edu/~ediener/Documents/SWLS_English.doc and self-anchoring cantril ladder

<https://www.ncbi.nlm.nih.gov/books/NBK189562>

validity (Diener et al., 2013)

- self-reported and subjective, but valid (people know whether they are happy) (Myers, 2000) and some reliability (precision varies)
- corr with objective measures eg brain activity (PET scans) (Layard, 2005)
- corr with suicide and mental health problems (Bray and Gunnell, 2006)
- corr with other people ratings (Layard, 2005, Di Tella and MacCulloch, 2006)
- not only correlates highly with other non-self reported measures, but also does not correlate with measures that are not theoretically related to it: happiness has discriminant validity (Sandvik et al., 1993)

validity, cont

- persons own eval: persons own weighteing, as opposed to some expert! useful eg as in swb v qol
- fleeting? no, relatively stable over time

outline

why study happiness ?

common and ancient wisdom (related to the five theories)

history and philosophy

can we study it scientifically?

five major theories [just quick, properly next week!]

the classics, the pioneers [subjective]

five major theories

- genes/set point (eg Schnittker, 2008)
- adaptation/adjustment; hedonic treadmill (Brickman et al., 1978)
- needs/livability (Veenhoven and Ehrhardt, 1995)
- comparison/discrepancies (Michalos, 1985)
- happiness just a motivator (Carver and Scheier, 1990) [rather momentary affective happiness than global cognitive life satisfaction]

genes/set point theory

- genes explain about half of everything, incl swb (eg [Schnittker, 2008](#))
- genes: bad rep in soc sci bc of Eugenics, Nazi, etc
- but that genes were misused doesn't mean they don't exist([Pinker, 2003](#), [Haidt, 2012](#))
- indeed, some are just happy/unhappy no matter what!
- genes aka 'set point theory': you win lottery, lose a limb, doesn't matter, your swb comes back to its set point

genes/set point theory

- a see homeostasis, eg cummins ch4 ?
- swb, like any physiological system requires homeostasis, a stable narrow range to function properly; about 70-90 on 0-100 scale; still some people are chronically low say due to arthritis or caring for an elderly; and some over time change is still possible
- or at least i'd say 20-90; quite unhappy fine, may be even motivating!; but extremely unhappy inhibits functioning
- not that set point is set in stone

adaptation theory (Brickman et al., 1978)

- [related to genes/set point]
- adjustment to external circumstances
- 'hedonic treadmill'
- *the more one has the more one wants, since satisfactions received only stimulate instead of filling needs* (Durkheim, [1895] 1950)
- human adaptation is astonishing:
 - winning millions in a lottery, losing limbs, etc
 - 1b in poverty and somehow manage, don't commit suicide—people can adapt to just about anything

needs/livability theory (Veenhoven and Ehrhardt, 1995)

- humans, like other animals have certain needs
- physiological needs like water, food, sleep; and other needs:
 - eg contact with other living organisms (biophilia, social capital, nature, etc)
 - and higher (human) needs eg belonging, selfactualization
- kind of like Maslow's Hierarchy of Needs
- if needs are satisfied, then happiness follows
- then there are attr of places, environment, or ecology
- if it is "livable" then happiness follows
- this is optimistic for public policy—we can change needs and livability provision

comparisons/discrepancies

- multiple discrepancy theory (Michalos, 1985)
- social comparison, eg co-workers, HS friends, relatives
- comparison to various standards, eg clothes, car expected in a given profession
- over-time: your swb now is determined by how you were doing in the past and what you expect in the future
- eg losing may be more felt than gaining (Kahneman and Tversky, 1979)
- “it is better to be a big frog in a small pond than a small frog in a big pond” (Davis, 1966)

happiness just a motivator (Carver and Scheier, 1990)

- [rather momentary affective happiness than global cognitive life satisfaction]
- “Happiness is the feeling that power increases—that resistance is being overcome.” Nietzsche
- SWB merely signals that task at hand has been accomplished
 - then it dissipates and pain settles in so that the signal is that I can move to another task!
- Earth is not for comfort/happiness, humans have not evolved to be happy but to reproduce (Euba, 2019) see superb ‘Selfish Gene’ (Dawkins, 2006); (also Schopenhauer, eg <https://www.youtube.com/watch?v=q0zmfNx70M4>)
- it’s for struggle, and pain has its motivating place
- happiness-seeking/pain avoidance is complacency

happiness just a motivator (Carver and Scheier, 1990)

- no pain, no gain!
- one must struggle to succeed
- one must even struggle to discover oneself!
- see Nietzsche, eg: <https://www.theatlantic.com/magazine/archive/2018/10/nietzsches-guide-to-better-living/568375/>
- people who are very emotionally stable may be too happy to feel the need to create
- “One must have chaos in oneself to be able to give birth to a dancing star.” Nietzsche

happiness just a motivator (Carver and Scheier, 1990)

- also like the earlier equation (Carver, 2003):
$$\text{swb} = \text{achievement/experience} - \text{expectations/aspirations}$$
 - if rate of progress below the reference rate: negative affect
 - if above: positive affect
- also if doing well: become satisfied, comfortable, possibly complacent (Carver, 2003)
 - until you fall below the reference line and it goes over again
- note: winner-take-all capitalism raises the reference line
(Frank, 2012)

dark side of happiness [follows from Carver]

- too much of happiness is not a good thing
- or perhaps even that there's a dark side to happiness
- Gruber et al. (2011) and <https://positivepsychology.com/dark-side-of-happiness/>
- (also Gilbert's "Stumbling on happiness")
- "too much of a good thing is a bad thing"
- food makes us thrive physically, happiness makes us thrive psychologically—but like food, swb not always good
- (like fame, success or even money—to get them—pursue other stuff like curiosity)
- "Success is not the key to happiness. Happiness is the key to success. If you love what you are doing, you will be successful" Herman Cain

dark side of happiness

- always being very happy may result from being out of touch with reality; and this may lead to dysfunction
- moderate happiness allows room for unpleasant emotions, which enable us to learn and grow and move forward
- if constantly very happy, why would you do anything?
- being too happy can make you:
 - pay less attention to details
 - less creative
 - take more risks [binging food and alc, drugs etc,sex]

dark side of happiness

- too much happiness can be dysfunctional and maladaptive
- extreme positive emotion is like mania; during mania can't experience negative emotions (that may be necessary, even for survival, such as fear)
- (btw flow seems similar to mania)

dark side of happiness

- you set some goal, say academic achievement
 - and then you fail
- disappointment/discontent/unhappiness is relatively fine for most goals
- but if your goal is happiness, then failure kills the goal!
- so the more you strive for happiness, the more likely it is that you will be unhappy
- say you are in a positive situation, a birthday party, and your goal is happiness, but you don't feel happy, then you fail your goal, and feel disappointed and even less happy!!
- instead, accept or not try to decrease negative feelings—be mindful and accept

outline

why study happiness ?

common and ancient wisdom (related to the five theories)

history and philosophy

can we study it scientifically?

five major theories [just quick, properly next week!]

the classics, the pioneers [subjective]

key people by the field

- Veenhoven; aka the Godfather of Happiness [soc; sir]
https://en.wikipedia.org/wiki/Ruut_Veenhoven
- Diener (and Seligman) [psy]
- Easterlin (and Oswald) [eco]
- Radcliff [polSci]

Campbell

- not just an early scholar, a pioneer
- but also comprehensive and indepth
- indeed, his book is not only relevant
- but many of the findings remain cutting-edge!
- also, it's about the US

Maslow

- a humanist, and into spirituality
- (like Jung, Fromm, and Marcuse)
- really great books:
- Toward a Psychology of Being

https://books.google.com/books?hl=en&lr=&id=jcKbDAAAQBAJ&oi=fnd&pg=PT15&dq=maslow&ots=eTsQFrXdED&sig=UlvB9X_8k3NCfVa-Nc08Zvw0zeo#v=onepage&q=maslow&f=false

- and Peak Experience (kind of like flow) [https:](https://en.wikipedia.org/wiki/Religions,_Values,_and_Peak_Experiences)

[//en.wikipedia.org/wiki/Religions,_Values,_and_Peak_Experiences](https://en.wikipedia.org/wiki/Religions,_Values,_and_Peak_Experiences)

Freud

- eg see his “Civilization and its discontents”
- (civ is based on suppressed or delayed gratification/happiness)
- https://books.google.com/books?hl=en&lr=&id=AW3z38T3u7YC&oi=fnd&pg=PP13&dq=freud+civilization+and+its+discontents&ots=6emidLE-nd&sig=6sA07tnq7Rk8_i1R2G4hLg4sq9o#v=onepage&q=freud%20civilization%20and%20its%20discontents&f=false
- note, i did psychoanalysis of city :)
- <https://rucore.libraries.rutgers.edu/rutgers-lib/52123/PDF/1/play/>

Fromm and Marcuse

- in general and short: joy, fun, spontaneity, no harm, positive attitude, kindness, equality, freedom, etc
- see google scholar for their writings, eg:

Fromm and Marcuse writings

- “Escape from freedom”

https://books.google.com/books?hl=en&lr=&id=d2g8L1sLykwC&oi=fnd&pg=PR9&dq=info:WPqc-LXi3BUJ:scholar.google.com&ots=JnDgRDoiLn&sig=dX7ipJr_fK8R6sxnrytdUYkIkMg#v=onepage&q&f=false

- “One dimensional man” [https://books.google.com/books?id=eXlTAQAAQBAJ&printsec=frontcover&dq=One-dimensional+man:](https://books.google.com/books?id=eXlTAQAAQBAJ&printsec=frontcover&dq=One-dimensional+man:+Studies+in+the+ideology+of+advanced+industrial+society&hl=en&sa=X&ved=0ahUKEwiImdSzn83dAhVNGt8KHShSBI8Q6AEIKTAA#v=onepage&q=One-dimensional%20man%3A%20Studies%20in%20the%20ideology%20of%20advanced%20industrial%20society&f=false)

Flow: the psychology of optimal experience (Csikszentmihalyi, 1991)

happiness equation

- happiness =
achievement or experience — expectations or aspirations
-
- that's one reason why too much educ doesn't help with happiness

some more key studies

- describe in few sentences
- (the need to belong) (Baumeister and Leary, 1995, Maslow, [1954] 1987)
-
- evolution/genes:
- Birds of a feather: Homophily in social networks (McPherson et al., 2001)
- The social cage: Human nature and the evolution of society (Maryanski and Turner, 1992)
- The Compass of Pleasure: How Our Brains Make Fatty Foods, Orgasm, Exercise, Marijuana, Generosity, Vodka, Learning, and Gambling Feel So Good (Linden, 2011)

- ANNAS, J. (1987): "Epicurus on pleasure and happiness," Philosophical Topics, 15, 5–21.
- BAUMEISTER, R. AND M. LEARY (1995): "The need to belong: Desire for interpersonal attachments as a fundamental human motivation," Psychological bulletin, 117, 497–529.
- BRAY, I. AND D. GUNNELL (2006): "Suicide rates, life satisfaction and happiness as markers for population mental health," Social Psychiatry and Psychiatric Epidemiology, 41, 333–337.
- BRICKMAN, P., D. COATES, AND R. JANOFF-BUMAN (1978): "Lottery winners and accident victims: Is happiness relative?" Journal of Personality and Social Psychology, 36, 917–927.
- BROOKS, A. C. (2021): "HOW TO BUILD A LIFE. There Are Two Kinds of Happy People. Some of us strive for a virtuous life. Others strive for a pleasant one. We could all use a better balance." The Atlantic.
