go public!

- ◇ make these maps public!
- ◇ show to relevant stakeholders, email to local organizations, institutions, local newspapers, etc
- ◇ it's a waste to keep such revealing maps in a drawer

what now?

- ◇ education is a process of turning \$ into knowledge, now reverse the process and turn knowledge into \$:)

academia: assisting faculty

- ◇ most faculty want maps but lack gis skills
- ◇ this is where you come in
- ◇ ask faculty around if they need help with data
- ◇ don't sell yourself cheap
 - ask to be a coauthor
 - make \$

postdoc/research institutes/think tanks etc

- ◇ many prestigious universities offer postdocs positions
 - often helping prestigious faculty with data
- ◇ money is not great
 - but you have all of the other benefits of academia
- ◇ same with research institutes
 - they have a ton of data
 - and need people like you to map it

non-academic, real world jobs

- ◇ any organization has data
 - libraries, gas stations, fire departments, hospitals, etc
- ◇ just search for gis jobs

gis jobs

- ◇ <http://www.gjc.org/>
- ◇ <http://www.gisjobs.com/>
- ◇ <https://www.gislounge.com/job-listing-sites-in-gis/>
- ◇ <http://www.mygisjobs.com/>
- ◇ <http://www.indeed.com/q-GIS-jobs.html>
- ◇ (there are many more websites)

general data science jobs

- ◇ <http://web.ccsu.edu/datamining/jobs.htm>
- ◇ <http://www.kforce.com>
- ◇ <http://www.icrunchdata.com/>
- ◇ <http://www.cybercoders.com/>
- ◇ (there are many more websites)

let's stay in touch

- ◇ i am always happy to discuss gis and
 - your future gis endeavors
- ◇ let's stay in touch!
