

Do What You Like

Tuesday 6th February, 2024 14:30

The effect size is remarkably large at around 2-3 for top categories—people who do what they like are about 2-3 happier on 0-10 scale than those who do not do what they like

XXX TODO ADD TO EBIB AS KEYWORD PAPER-CODE-NAME AND TAG WITH EBIB KEYWORDS

1

lit: freud: civ and its discontents!!!—yes this must be a start

and goog sch myself "do what you like and happiness"

can frame it like whats most important for happiness? health? family? noooo!!! do what you like is!!!!

<https://slate.com/technology/2014/01/do-what-you-love-love-what-you-do-an-omnipresent-mantra-thats-bad-for-work-and-workers.html>

the idea is great at least in theory—If you love what you do, it's not work; cant go wrong with steve jobs advice <https://www.youtube.com/watch?v=UF8uR6Z6KLc>

You've got to find what you love. And that is as true for your work as it is for your lovers. Your work is going to fill a large part of your life, and the only way to be truly satisfied is to do what you believe is great work. And the only way to do great work is to love what you do.

similarly thoreau wrote it would be good economy for a town to pay its laborers so well that they would not feel that they were working for low ends, as for a livelihood merely, but for scientific, even moral ends. Do not hire a man who does your work for money, but him who does it for the love of it cited in slateArticle

but then the good theory doesnt work out in practice

and capitalist can use do what you love "DWYL" to their interest, eg why pay decent salary if a person loves what she does, or even why pay at all—can be an unpaid intern.

for massess, there are at least 2 classes: few in the rich creative ones like professors (not PTLs/adjuncts) and mass of laborers who just clearly can't possibly love these typical low end jobs (and at the same time are in no position to have a job that they would love or at least it is very difficult and long path to get there)

slateArticle gives many examples like PTLs/adjunct professors, unpaid interns, personal care aide and home care aide

but then look at these colombians half of the sample love what they do! and believe me colombian jobs are worse than american ones! cp paste some of these from col qol swb paper

1 Data

En una escala de 0 a 10, dónde 0 significa nada satisfecho y 10 significa totalmente satisfecho, ¿qué tan satisfecho se siente con los siguientes aspectos de su trabajo? Las actividades que realiza (le gusta lo que hace) [lina](#)—why this q? any literature?

todo add actual questions asked, eg family and relationship satisfactions

¹Following the literature we use terms swb, happiness and life satisfaction interchangeably, but specifically we mostly mean life satisfaction.

Table 1: Variable definitions.

name	description
life satisfaction	"On a scale of one to ten, rate how satisfied are you with your life."
do what you like	"Satisfied with the activities you do (like what you do)"
race	indigenous, other, black, or
education	primary, secondary, technical, professional, postgraduate, or none
health satisfaction	"health satisfaction"
female	"female"
family satisfaction	"family satisfaction"
relationship satisfaction	"relationship satisfaction"
socio-economic strata	"What is the socio-economic strata of your home?" 1-5 (strata 5 and 6 were combined together as there were very few respondents living in strata 6)
income	"How much on average income?"
age	age

Note that income is expressed in terms of monthly minimum wage (SMMLV).

lina well little bummer its like one of the questions among others on job, so Lina: is it do what you like in general or job only or ambiguous??? and then if include P06001001 then that one is acually bigger beta .17 and dowhatyou like just .13

but still can argue that P11000101 is an overall construct on job encompassing do what you liek and other stuff and still when regress ls on all job stuff, its the strongest

and this one is strong too: but thats mental health Days in which I do not enjoy good mental health P10000402

2 Results

The happiness and do what you like distributions are in figure 2. Happiness has an interesting dip at 9 a ton of at 10. Do what you like has a bump at 5, at 8, like half at 10. It is clear that there are very few people do what you like in bottom categories, hence we collapse the first four categories into one (crosstabs in online appendix). Likewise, the outcome happiness has few observatioons in bottom categories, while we use OLS here, we also do categorical models in online appendix as a robustness check—results are similar and if anything stronger.

Figure 1: Distributions.

Table 2: OLS regressions of life satisfaction.

in a1 super strong mind blowing effect, almost unchanged by basic socio-demographics in a2. Additionon of income (and neighb socioeconomic status) understandably cuts the effect—to do what you want you need money—but the cut is actually surprisingly low, the top category is still around 3, the next lowest about 2.5 and subsequent 2 at around 2. These are still unexpectedly large effects. Health in a4 cuts a bit more.

And finally in a5 again surprisingly addition of family and relationship satisfactions only cuts the magnitude a little—still in this full model the top category is about at 2.5, second at around 2, and next 3 at 1.5-2.

ONLINE APPENDIX

[note: this section will NOT be a part of the final version of the manuscript, but will be available online instead]

Do what you like—Song By French Affairs

Do what you like What you want tonight? Show me all your loving And I make you high Tell me what you like? Is burning in your eyes Baby, don't be shy Your love was no disguise Tell me what you like Do what you like What you want tonight? Do what you like If you want it like this Or if you want like that You've gonna tell me what's inside your mind You've gonna show me what you really like If you want me to do What you really wanna do You gonna show all your secret's to me So I can see Tell me all your fantasy And now I'll tell you mine I want you close to me I want you for tonight Gonna let your body flow I don't see nothing wrong Baby, don't go too so slow And keeping it going on Do what you like What you want tonight? Show me all your loving And I make you high Tell me what you like? Is burning in your eyes Baby, don't be shy Your love was no disguise Tell me what you like Do what you like What you want tonight? Do what you like If you wanna make it real What you really, really feel You gonna tell me And express yourself Don't put your lovin' on a shelf If you want us to be one Not only have some nights of fun You gonna show all your secrets to me So I can see Tell me all your fantasy And now I'll tell you mine I want you close to me I want you for tonight Gonna let your body flow I don't see nothing wrong Baby, don't go too so slow And keeping it going on Do what you like What you want tonight? Show me all your loving And I make you high Tell me what you like? Is burning in your eyes Baby, don't be shy Your love was no disguise Do what you like What you want tonight? Show me all your loving And I make you high Tell me what you like? Is burning in your eyes Baby, don't be shy Your love was no disguise Do what you like Do what you like Tell me what you like? Do what you like
