outline

why data management?

Python v R v Stata

[*] bonus—soc sci data sources [skip, can look at home]

introductions (see if others overlap: collaborate!)

- `https://theaok.github.io`
- your research interests and data?

outline

why data management?

Python v R v Stata

[*] bonus—soc sci data sources [skip, can look at home]

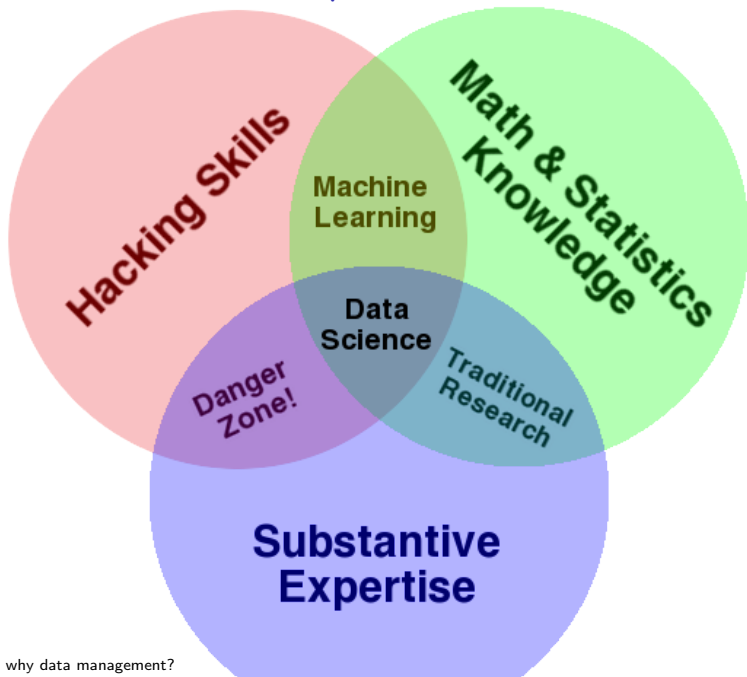

data revolution!!

- most jobs/tasks require or benefit from programming
- qualitative data (pictures, text, etc.) are just rich quantitative data and can be analyzed like quantitative!
- everything can be quantified or not? any examples of non-quantifiable things ?

data management is fundamental

- in order to analyze data you need to manage it first
- GIGO (Garbage In Garbage Out)
 - if data management fails, data analysis fails
-
- takes more time to prepare data than to analyze it
- start early with the right data!
 - you're passionate about
 - is doable/easy data
 - advance your career/think beyond school

already have stat/math and subst, need hacking!

outline

why data management?

Python v R v Stata

[*] bonus—soc sci data sources [skip, can look at home]

a critical decision!

- takes months to get productive with software
- takes years to master
- excel and spss are junk that no one should use
- sas: a dinosaur (still, often industry standard)

which one?

- stata: user friendly, fast, very concise code
- r: user unfriendly, slow; weird code! for math people
- py: clean and fun; for IT people

which one?
