

ps0: upto 3 points of extra credit (due sep9, next wk)

[version: Tuesday 7th October, 2025 11:32]

1. write a one page outline or an abstract or a summary of what you'd like to write a paper about in this class
2. be as specific as possible; eg: lit rev only (and i'd do quant for you)? quant? (dataset, vars, model)
3. ideally latex or google doc link; or may submit as txt or pdf into Canvas
4. again, in addition to assigned readings, dont forget about doing your own lit rev! whatever you study, just put that and 'happiness' into goog sch and do lit rev! eg for libraries: https://scholar.google.com/scholar?hl=en&as_sdt=0%2C31&q=libraries+and+happiness&btnG= then may adjust query, say https://scholar.google.com/scholar?hl=en&as_sdt=0%2C31&q=reading+books+and+lhappiness&btnG= or: https://scholar.google.com/scholar?hl=en&as_sdt=0%2C31&q=public+space+and+happiness&btnG= lit rev takes time, and is necessary, start now!
5. again, to figure stuff out it's critical to spend a lot of time (say >10hrs ; ideally >25hrs per week) on google scholar!

remember about inline response to my comments: https://theaok.github.io/swb/final_project.pdf: chapter "inline response;" that is just copy-paste my comments and reply to each one by one; can be short like a sentence; can also disagree, but have to reply to each comment; eg https://theaok.github.io/docs/rev_ariq.pdf
