Dear Search Committee:

January 21, 2019

I am responding to your advertisement for the Full/Associate/Assistant Professor in Sociology (Reference No.: FSS/DSOC/11/2018).

My research interests are interdisciplinary and bridge across sociology, psychology, and geography. I mostly study subjective wellbeing and urban sociology. For a list of publications see my CV.

Finally, I would bring unique skills in data science. I regularly program and write scripts in Python and Stata, and I use Qgis and Geoda for spatial visualization both in my research and teaching. I manage and analyze “big data” (millions of observations or hundreds of GB), including unstructured text data.

Sincerely,

Adam Okulicz-Kozaryn
