course summary (repetitive boilerplate, ONLY if we have time)

outline

misc

misc2

course summary (repetitive boilerplate, ONLY if we have time)

ps6

- ◇ do not overcomplicate!
 - better to have simple clean code that does the job
 - than messy complex fancy code that is wrong
- ◇ if parts of code take long time to run, say $> 10min$
 - optimize it, take random sample, etc
- ◇ again, it always must start from the very raw data!
- ◇ easy to make mistake:
 - think about it AND cross check; correctness is important!

ps6

- ◇ explain what you are doing!
- ◇ interpret things!
 - eg when you run descriptive stats, **and** find sth interesting, put a comment and say what you have found in few words
 - (don't comment output of every command)

ps6

- ◇ google things!
- ◇ before writing the code check if someone already wrote it
- ◇ and build on others work! ie copy and adapt and improve
- ◇ eg googling 'world development indicators stata'
 - yields `http://www.stata-journal.com/sjpdf.html?articlenum=dm0045`
 - "Using the world development indicators database for statistical analysis in Stata"
 - exactly what 2 of you are doing

got songs about stata, regressions, dissertations?

- ◇ <https://vimeo.com/852637>
- ◇ <https://www.youtube.com/watch?v=42odMdLwZKI>
- ◇ <https://www.youtube.com/watch?v=Ga6p0iiTn0Q>

publish or perish

- ◇ coding is fun
- ◇ but don't lose the end goal from your sight
- ◇ yes, you are an amateur software engineer—it helps a lot
 - it's actually necessary these days!
- ◇ but you are a professional soc sci
- ◇ your end goal is a publication
- ◇ 'keep article pipeline full'
 - at any time i have at least 3 articles under review
- ◇ how about you ? submit a paper !
 - start simple, even just some des stats...but keep on submitting papers

course summary (repetitive boilerplate, ONLY if we have time)

spread the word

- ◇ if you liked the class or have learned something useful
 - spread the word
- ◇ i'd like to teach it in the future
- ◇ and i'd like to teach more classes like this
- ◇ maybe even have certificate or degree in data science
- ◇ i need students !

future research

- ◇ you've probably realized that i am into
 - Stata, Python, data
- ◇ and always happy to discuss them
- ◇ let's stay in touch!

keep your inner stata alive!

- ◇ `http://stata.com`
- ◇ `http://www.stata.com/bookstore/books-on-stata/`
- ◇ `http://www.stata.com/links/resources1.html`
- ◇ `http://www.michaelnormanmitchell.com/stow/category/
data-management`
- ◇ `http://www.stata.com/links/`

what next?

- ◇ make use of your data management skills...
- ◇ use it or lose it
- ◇ apply for postdocs (eg subscribe to POLMETH listserv)
- ◇ collaborate with faculty
 - faculty need your data management skills
 - they know much less about data mgmt than you!
 - and in general, just make \$!

make \$

- ◇ industry data jobs usually require SAS, SQL, Python, Java
- ◇ but there are many Stata jobs, eg:
 - ◇ <http://www.job-search-engine.com/keyword/stata/>
 - ◇ http://www.careerbuilder.com/Jobseeker/Jobs/JobResults.aspx?ch=&rs=&s_rawwords=Stata
- ◇ and a ton of data science jobs:
 - <http://web.ccsu.edu/datamining/jobs.htm>
 - <http://www.kforce.com>
 - <http://www.gadball.com>
 - <http://hotlinuxjobs.com/>
 - <http://www.icrunchdata.com/>
 - <http://www.cybercoders.com/>
