IDE/GUI: Spyder: /usr/local/anaconda/bin/spyder

◇ kind of like Stata or RStudio

◇ on the left we have code

◇ and it runs on the right in 'console'

◇ and some other less useful windows that you can drop

◇ at the top a bunch of menu items

◇ but most of the time just highlight code you want to run

· and hit:

· green 'play' triangle icon with blue rectangle to the left

· or better just press Ctrl-Enter to run selection

· note: for win paths may need double backward slash $\backslash\backslash$
