ps4: first draft plus presentation of a final paper

[version: Wednesday 4th April, 2018   08:03]

1. submit a first draft of final paper, and briefly present in class (max 10min, i will cut you off!)

2. take into account our comments on the previous ps

3. you *may* include things that you submitted for previous ps

4. however, if you would like to include anything that you have submitted for any other class you may do it, but you *must* indicate clearly in the paper that it was submitted earlier–best say it on the first page as a disclaimer...

5. the "so what question"–why is it important, why we should care, what is new there, what is your contribution?

6. **important:**   in the final project you need to respond to my criticism of this ps and presentation inline (like in peer reviewed journals); eg `https://sites.google.com/site/adamokuliczkozaryn/gis_int/rev_ariq.pdf`

7. specify target journal (and make sure your paper resembles papers published there!)

8. cite! like say 20-80 research pieces

9. pages: like 12-35, say median 20sth

general directions (always the same)

1. Use your dataset. Again if you do not have a dataset, have a look at "data_sources.csv", and pick something.

2. Naming: name your files clearly

3. You can work in a group (of upto 3 people)

4. Keep in mind the replication principle `http://gking.harvard.edu/files/replication.pdf` e.g. State explicitly what exactly data sets you are using and what the variables mean (be as specific as possible; if description is lengthy, put it in the appendix)
