what is social capital?

- social capital not only civic engagement (voting etc);
  broader: any social connection: bowling, dating, church,
  etc
- christakis/fowler: network property is connections: like
  graphite and diamond defined not by stuff but connections
- soc cap is key to com dev; indeed com dev ≈ soc cap dev
- or not? discussion?
- soc cap is also a key component (but not the same!) of
  QOL
- and soc cap is a key predictor of SWB
- QOL can be objective or subjective and they are different
  (?)
