AI

- again need to cite ai
  - (and dont overuse it–i take points off)
- its good to use ai, its a skill, and great tool, but need to cite it and it must be clear whats yours and whats ai's
  - dont say 'used claude,' give me prompts and output, full log
- more is less: in general i'd ditch some maps, you have pleny, just pick the best ones
- you have enough here, cut back, think it through, interpret, tell a story–whats the overall main bottomline
- one way to move forward is to have 2 notebooks or 2 big sections: one fully ai and the other fully yours
