

one v several graphs/maps

- to convey an idea (tell a story) usually need several maps
- say if you want to show deprivation in SJ:
 - eg low educ, poverty, crime, etc etc
 - but can also show a summary, eg an index
- sometimes better in one graph/map
 - eg showing change: better one than 2; just calc chng var $100 * (\text{pop10} - \text{pop00}) / \text{pop00}$
