first map of swb in fig 1

Figure 1

ha nj not happy; neither north east neither midwest, and then this belt from tx to north, and east of tx happy incl ca

then pop siz, it is very right skewed distribution, hence we plot it without outliers dropping obs>1m 45 of them out of >3k obs (full range in app). it is slightly quadratic inverted u shape where it flips around 400k consistent with (Okulicz-Kozaryn 2017), but the difference here is that swb increases up to several hundred thousand, while in Okulicz-Kozaryn (2017) it doesnt
