

Geography of Colombian Life Satisfaction

Sunday 26th April, 2026 08:40

XXX TODO ADD TO EBIB AS KEYWORD PAPER-CODE-NAME AND TAG WITH EBIB KEYWORDS

This paper is about geography of Colombian happiness.¹ We start with departments/provinces, then move to cities/municipalities, and finally finish up with urban-rural and farmers.

about colombia boilerplate like 2nd biggest land mas and pop in lat am? one of the happiest that table from fools paradise

and need about geography like goog 'gepgraphy of colombia' in goog scholar and normal goog

about roads etc ranked one of thw worst and airports

We know little about colombian happiness: my paper, stiupid burger as cited in my paper, and that govt report i cite in my paper!!
do skim thru it!!

1 Data

We use a great source of data ECV. We use 2023 edition.

2 Departments/Provinces

there are 166k missing out of 242k, we conduct robustness check in appendix using 2021 wave

the map is below, table including number of obserrvations per province is in appendix

¹Following usual practice in social indicators research terms happiness and life satisfaction are used interhchangeably, and specifically we mean cognitive and evaluative life satisfaction rather than affective happiness.

Figure 1: Similar to 2021 robustness/sensitivity check in appendix except: small sample Amazonas and Vaupés, both South-Eastern at 8.3 in 2023 v 7.6 in 2021, a .7 difference. Second largest differences: Santander and Putumayo increased by .4 from 2021 to 2023.

3 Cities/Municipalities

4 Urban-Rural and Farmers

While most developed countries cities are unhappy and indeed unhappy city is a common pattern across the world (Okulicz-Kozaryn and Valente 2021), it is not always the case in developing countries.

here boilerplate from happy col unahhpy bog: that cities are growth engines Glaeser (2011) and O'Sullivan (2009) and developing countries like colombia do need economic growth hence role for cities is gretaer than in already developd countries

and there is paradox of happy peasant and unhappy millionaire Graham (2009)

though not so much in colombia, urban and rural are about same happy, except by income: bar chart by income category bu urb
rur as in raman

ONLINE APPENDIX (Supplementary Online Material (SOM))

[note: this section will NOT be a part of the final version of the manuscript, but will be available online instead]

```
. tabstat ls, by(lwd7) stat(mean sd) format(%9.1f)

Summary for variables: ls
Group variable: lwd7 (RECODE of lwd (do what you like))
```

lwd7	Mean	SD
0-4	5.6	2.7
2	7.6	2.3
3	7.6	1.8
4	8.0	1.5
5	7.8	1.9
6	8.2	1.5
7	8.9	1.5
Total	8.3	1.9

5 Reestimation Using 2023 ECV

2021 May be biased say bc of covid, especially that it peaked in colombia in 2021 <https://coronavirus.jhu.edu/region/colombia>(by 2023 used in the paper it pretty much cleared). But it a useful robustness check, if covid didnt change much , then it should be pretty stable

and it was quite high mortality in col <https://coronavirus.jhu.edu/data/mortality>

5.1 Departments/Provinces

Again as said in the paper, overall results are similar to 2023 reported in the body of the paper, except small sample Amazonas and Vaupés, both South-Eastern and with 8.3 in 2023 v 7.6 in 2021, a .7 difference. Sencond largest differences are for Santander and Putumayo which increased by .4 from 2021 to 2023.

Table 1: Life satisfaction by department.

department	life satisfaction 2023	total 2023	obs	non-missing life satisfaction 2023	department	mean life satisfaction 2021	total 2021	obs	non-missing life satisfaction 2021
Amazonas	8.3	276	245	Amazonas	7.6	423	365	0.	
Antioquia	8.2	5499	4729	Antioquia	8.3	6036	5060	-0.
